

DLG Test Report 6879

Josera Polska Sp. z o.o., Nowy Tomyśl

Mineral feed for cattle, mineral feed for pigs

Supplementary "Product and Process" test

**CONTINUOUS
MONITORING
SUPPLEMENTARY TEST**

✓ **Product and Process**

DLG Certificate 6879
www.DLG.org

Overview

The DLG quality mark for farm inputs and consumables is awarded to products that have passed a comprehensive test which verifies their value-determining features and properties as declared by the manufacturer. The criteria tested and the requirements to be met by the product are defined by independent test commissions, taking into account statutory requirements, the purpose of the product, its declared properties and user requirements.

The test procedures and product requirements are developed by the relevant DLG e.V. department and the relevant commission. The procedures and requirements are in line with governing law and the state of the art in technology and science. After a product has passed the test, it is awarded the DLG quality mark and all products which have received the quality mark are published.

Test results

Type of feed and criteria	Requirement	met
Mineral feed for pigs		
Bulk elements	better than the regular type	✓
Trace elements	better than the regular type	✓
Vitamins	better than the regular type	✓
Amino acids (if applicable)	better than the regular type	✓
Feeding directions	clear and easy to understand	✓
Declaration	complies with the tolerances specified by animal feed regulations	✓
Mineral feed for cattle		
Bulk elements	better than the regular type	✓
Trace elements	better than the regular type	✓
Vitamins	better than the regular type	✓
Feeding directions	clear and easy to understand	✓
Declaration	complies with the tolerances specified by animal feed regulations	✓
Supplementary "Product and Process" test		
Factory audit	complies with DLG codex on compound feeds	✓
Composition of the feed	complies with the declared composition	✓
Inhibition assay	negative	✓
