

DLG Test Report 7073

Shell Global Solutions (UK), London

**Shell differentiated
Fuels and Lubricants
in combined use**

**CONTINUOUS
MONITORING**

DLG Certificate 7073

Overview

The DLG quality mark for farm inputs and consumables is awarded to products that have passed a comprehensive test which verifies their value-determining features and properties as declared by the manufacturer. The criteria tested and the requirements to be met by the product are defined by independent test commissions, taking into account statutory requirements, the purpose of the product, its declared properties and user requirements.

The test procedures and product requirements are developed by the relevant DLG e.V. department and the relevant commission. The procedures and requirements are in line with governing law and the state of the art in technology and science. After a product has passed the test, it is awarded the DLG quality mark and all products which have received the quality mark are published.

The products tested

- Shell FuelSave Diesel/Shell Diesel Extra/Shell Diesel with DYNAFLEX Technology (fuel)
- Shell Rimula R6 LME Plus 5W-30 with DYNAMIC PROTECTION PLUS Technology (lubricant) in combined use

Test results

Test	Anforderung	Requirement
Fuel savings achieved in comparison using regular products		
Fuel consumption measurements on the DLG pto stand	statistically significant effect on fuel economy	✓
Fuel consumption measurements in the DLG PowerMix	statistically significant effect on fuel economy	✓
