LED Indoor Spotlight Premium-Line

Resistance to Ammonia,
Cleaning distance, Flickerfree,
Approved luminous efficiency

**PATURA
LED INDOOR SPOTLIGHT
PREMIUM-LINE**

- ✓ Resistance to ammonia
- ✓ Cleaning distance
- ✓ Flicker free
- ✓ Approved luminous efficiency

DLG Test Report 7549

Overview

A test mark “DLG-APPROVED for individual criteria” is awarded for agricultural products which have successfully fulfilled a scope-reduced usability testing conducted by DLG according to independent and recognized evaluation criteria. The test is intended to highlight particular innovations and key criteria of the test object. The test may contain criteria from the DLG test scope for overall tests, or focus on other value-determining characteristics and properties of the test subject. The minimum requirements, test conditions and procedures as well as the evaluation bases of the test results will be specified in consultation with an expert group of DLG. They correspond to the recognized rules of technology, as well as scientific and agricultural knowledge and requirements. The successful testing is concluded with the publication of a test report, as well as the awarding of the test mark which is valid for five years from the date of awarding.

PATURA LED INDOOR SPOTLIGHT PREMIUM-LINE

- ✓ Resistance to ammonia
- ✓ Cleaning distance

- ✓ Approved luminous efficiency

DLG Test Report 7549

The ammonia resistance test was performed as a laboratory test according to the patented DLG test standard. This test is intended to determine the suitability of equipment for animal living areas to withstand the impact of animal environments. The cleaning distance test assesses the suitability for cleaning animal living areas. In the Flicker-free test frequencies and modulation depth is measured. The approved luminous efficiency test gives an indication how efficient a luminaire is. Other criteria have not been assessed.

Assessment in brief

The “LED Indoor Spotlight Premium-Line” passed the ammonia resistance test, the cleaning distance test, the flickerfree test and the approved luminous efficiency test. The 100 W and 240 W version was tested.
